

DKE

RMQ public
3-node clusters

2. Another RMQ another IP

1. No TLS NOT SECURE HTTP

3. Easy to DDOS incorrect
take offline credentials
crashes RMQ

1. TLS in front of HTTP & AMQP
(continue doing the same for other protocols)

2. SNI for TLS

3. Connection throttling / Blacklisting? IPs

Cluster Operator example ↗

PRE-REQS ✓ 1. Digital Ocean RBS — DKE
2. kube-prometheus-stack
3. cluster-operator

NEXT STEPS : — PRE-REQ 2 → see episode 7
— PRE-REQ 3 → —//— but 1.0.0
— install RMQ cluster with LB
↳ see episode 5
— show insecure HTTP (AMQP implied)
— secondary RMQ cluster → new LB

— show DDos RabbitMQ
